

# 5 five trends

AT FRANK WEBB HOME

## Today's Toilets

**1. Self-Cleaning Toilets** Eliminate one of the most undesirable home chores and save valuable time with a self-cleaning toilet. Every flush in a self-cleaning toilet helps to keep the bowl free of grime, germs and stains. Some models use cleaning solutions and superior flushing technology, yet others utilize ultra-violet light and electrolyzed water. The American Standard *ActiClean Self-Cleaning Toilet* uses a cleaning solution combined with a powerful *VorMax* flushing system, offering both a "Quick Clean" and "Deep Clean" cycle for a bowl that sparkles.

**2. One-Piece Toilet** A single form creates a one-piece toilet. This provides a sleek look and is easier to clean, as there is no seam between the tank and bowl.

**3. Flush Mechanisms** Today's toilets offer various flushing options. Some styles come with a lever, others with a set of buttons that allow you to choose between alternative water settings: one with a larger flush, one with a smaller flush, which is great for water conservator. Others offer hands-free flushing, where a sensor detects hand motion to engage the flushing action.

**4. Wall-hung Toilets** Wall-hung toilets are tied into the wall, rather than sitting on the bathroom floor. These offer a more contemporary look, make cleaning the floor easier and save space as well. Note that the piping for this is not in the traditional location.

**5. Washlets** These cleansing toilet seats have a water spray feature that cleans and dries the user, reducing the need for toilet paper. According to 500 National Kitchen & Bath Association designers, washlets are one of this year's top requests.

*Imagine hundreds of exceptional bath, kitchen and lighting products from trusted brands, in settings that help you envision them in your own home. At Frank Webb Home, you'll find classic styles alongside the newest trends. A friendly, accessible staff offers guidance and detailed coordination to ensure that your project goes smoothly.*
